ATTENTION: Behaving quite stable now though, this stuff is still under development.

Remember to read and follow ALL manuals below, and use it at your own risk.

Naval Artillery System(NAS) is basically an expansion of the amazing BahamutoD's BDArmory, providing a set of naval weapon replicas and weapons used to attack naval ships from both side in WWII. It is still WIP, and not so detailed, we would improve that soon. PERHAPS

The pack is now under development of a modding team named Kerwis, members of which are all from China. I am honored today to post this small expansion to you all!

REQUIRES:

BDArmory v0.10.1 or later. Older versions are not supported.

(Alternative link and may update slower than SpaceDock)

updated this, cause I have ran into problems with the main cannons like the 16" and some of the others. They fire like machineguns and fire all the ammo in a few seconds without actually doing anything. All it does is shoes the firing effects and smoke effects and plays sound effects, but no damage to anything hit.
